

# SmartShare Cryptobox Document Encryption Box

Companies need to archive and protect important documents to support business functions. Automating filing, archiving and sharing of documents by a next-gen electronic document management system (EDMS) can help streamline and standardize business processes, sustain business continuity, avoid errors and improve productivity. However, traditional EDMS solutions take months to implement and cost extra IT resources to support.

## CryptoBox

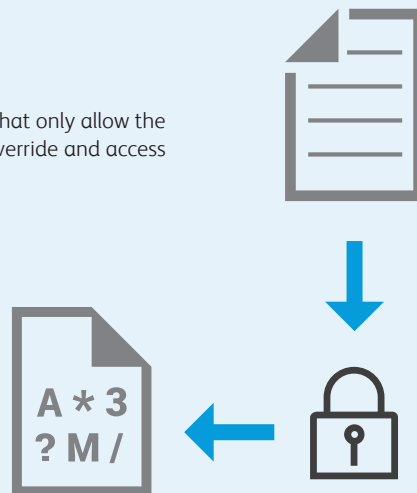

Cryptobox is a tremendously affordable and user-friendly appliance with numerous innovative functions packed in a box which help SMBs securely manage important documents to transform business to agile model. It is tightly integrated with Fuji Xerox Multifunction Device to provide end-to-end paper-to-digital transformation. The scanning process can be streamlined and standardized in a click.

## CryptoZone

### Secure Your Documents with Extra Protection

Documents are encrypted and stored in CryptoBox – the compact appliance that only allow the user to access his/her own data. Even the administrator has no authority to override and access it.

- File names and content of documents are encrypted and saved in CryptoZone to defend against unauthorized access
- Encryption at content level protects important documents from data exfiltration

## Ransomware Prevention

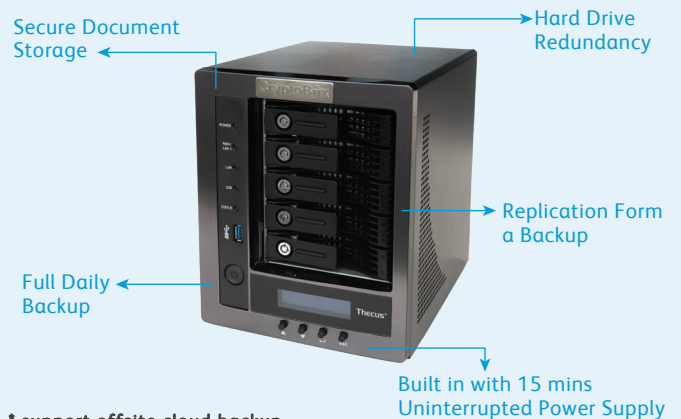

The solution runs on reliable Linux OS hence users are immune from ransoms such as WannaCry which target vulnerabilities of Windows OS.

### Redundant Secure Document Storage

A one-to-one copy of Secure Document Drive will be created in real time on a secondary drive to ensure documents are protected against hardware failure.

### Safeguard Data against WannaCry with Backup

Daily auto backup to separated hard drives that help restore unaffected data minimizes damages brought by ransoms. Replication of both locals and offsite backups are enabled for convenient retrieval of data.

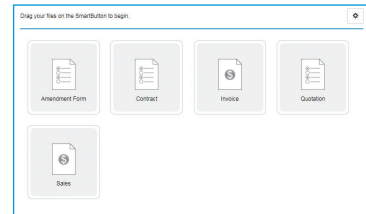

\* support offsite cloud backup (exclude backup service)

# Enterprise Class EDMS in a Box

## Small in Size, Save Your Space for Easy Management

With physical size smaller than a carton of A4 papers, CryptoBox includes proven enterprise class EDMS features that suit different business usages include innovative functions such as **SmartButton** and **Industry Standards-based Folder Templates** which automate, standardize and expedite document filing process.

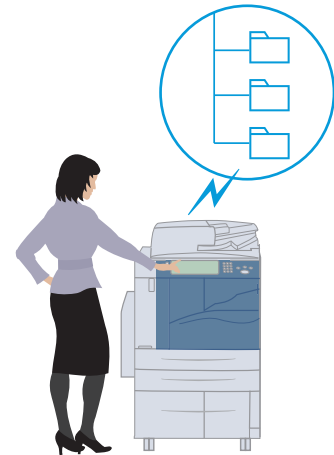

- SmartButton standardize and simplify commonly used filing processes and avoid errors with just 1 click
- Industry standards-based folder templates for industries include AEC, Education, Finance, Healthcare, Insurance, Logistics and more to help SMEs adopt proven file structures that best suit the company
- Share documents with external parties with full control include self-destructive document functions unfound in other EDMS
- Instant preview of Office documents, images and support mobile devices with responsive layout
- Leave comments and tags on documents for easy classifications and retrieval
- Allow subscribing documents and enable authorized users to turn on Team Alerts to notify specific users when documents are uploaded, revised or deleted

## CryptoBox with MFD Connector

The solution can be used with your existing Fuji Xerox MFD for effective documents sharing with advanced control features.

- Enable scan and upload hardcopies with 1 click
- Allow adjusting sharing options such as adding watermark, document access options, expiry period of file and more

### System Specification

- Full enterprise class EDMS functions in a box
- Support 5, 10 or 15 users
- Total storage: 8TB (2TB as usage storage and 2TB x 3 as back-up and redundancy)
- Number of documents: Up to 300K documents

\* Exclude offsite backup service
